

As an resident of Indiana, I want to speak out against proceeding 02-278. I am very satisfied with State of Indiana's Do Not Call Law and do not want this law diminished in any way. Furthermore, I believe that this issue of companies attacking this law is for the State of Indiana to handle and not the Federal Government. I believe this issue should fall under states right. One final comment, millions of people here in Indiana have made a choice by signing up for the states No Call List. They decided they don't want their privacy invaded by 4 or 5 unsolicited telephone calls a night. I beleive it's time for telemarketing firms and the companies that utilize them to respect that choice. It's that simple.

Thank You
